

"Zero-F" MOP

Zero Fibre Mop

SURGIWEAR has brought an ultra new concept for surgeons "Zero-F Mop" for surgeries. Conventional surgical mops are made of multi layers of gauze stitched on sides or similar material. These mops are made of cotton fibre threads. During use cotton fibres (lint) are shed on the wound surface and on the organs touched by the mops. These fibres can lead to multiple types of problems such as nidus for infection, fibre granuloma, foreign body reactions, fever & other related problems. In "Implant surgery" these fibres can increase risk & complications associated with the implant. In Neurosurgery these fibres may cause epilepsy & other problems.

One may ask why these problems were not observed or noticed. There are always some post-operative problems. Some of these problems can be traced to these fibres inside the body. You will find the difference in results after use.

a ADVANTAGES

- No loose fibres to shed. Therefore zero linting.
- Zero-F mop is smooth it will not damage surface of organs and tissue.
- Zero-F MOP is radio opaque. During the manufacturing process, a radio opaque thread containing Barium sulphate is added to make it radio-opaque. This quality will help surgeon to identify any lost sponges.

d DESCRIPTION

Zero-F mop is the answer to the problems due to fibres. It is made of filament yarn and sides are bonded by a special process. Even the handle is made of filament yarn only. Stitching is also done with filament yarn thread. During use hardly any fibre will be shed, because there is no loose fibre to shed. The mop carries a radio-opaque marker too. So, the mops can be detected on x-ray. Zero-F mop has a very good water absorbency.

p PRESENTATION

- Zero-F Mop is meant for single use only.

p PRESENTATION

Supplied in peel open pouches, ready to use & sterilized by EO.

Product Name	Code	Size
Zero-F Mop Extra Large	ZF00	30 x 30 cm
Zero-F Mop Large	ZF01	22 x 22 cm
Zero-F Mop Medium	ZF02	22 x 11 cm
Zero-F Mop Small	ZF03	11 x 11 cm

be all free from disease & sufferings
